PROFESSIONAL SUMMARY

Full-Stack Web Developer and Computer Science undergraduate skilled in building scalable, responsive web applications using **Python, Django, Flask, JavaScript (ES6+), React.js, Node.js, REST APIs, and PostgreSQL**. Experienced in **Agile development, version control (Git/GitHub)**, and cloud deployment on **Heroku and Render**. Strong understanding of **MVC/MTV architecture, API design, cross-browser compatibility, responsive design, and web performance optimization**. Complementary knowledge in **Machine Learning** and **Cybersecurity**. Actively seeking a Web Development Internship to contribute to real-world, user-centric digital products.

TECHNICAL SKILLS

Languages & Web:	Python, JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, SQL, Bash/Shell Scripting
Frameworks:	Django, Flask, Django REST Framework, React.js (basics), Bootstrap 5, jQuery, Jinja2, Tailwind CSS (basic)
Databases & ORM:	PostgreSQL, SQLite, MySQL; Django ORM, SQLAlchemy; Database design, indexing, migrations
APIs & Integration:	RESTful API Design, JSON, HTTP/HTTPS, Postman, Swagger/OpenAPI, Webhooks, AJAX
DevOps & Tools:	Git, GitHub, VS Code, Linux (Bash), Docker (basic), Heroku, Render, Nginx (basic), CI/CD basics
Web Concepts:	Responsive Design, Mobile-First Development, Cross-Browser Compatibility, Web Performance Optimization, SEO basics, MVC/MTV Architecture
ML & Data:	Pandas, NumPy, Scikit-learn, Feature Engineering, Model Evaluation, Data Preprocessing
Cybersecurity:	OWASP Top 10, Secure Coding Practices, Kali Linux, Wireshark, Penetration Testing basics
Soft Skills:	Agile/Scrum, Problem-Solving, Team Collaboration, Communication, Attention to Detail, Fast Learner

PROJECTS

NovaMind: AI-Powered Conversational Chatbot Platform

Tech Stack: Java, Spring Boot, Apache OpenNLP, GPT-4o API, WebClient, REST APIs, HTML/CSS/JavaScript

Bullet points:

- Built a full-stack AI chatbot platform with a **Spring Boot REST API backend** (`/api/chat`) consuming **GPT-4o via WebClient**, featuring a custom **NLP preprocessing pipeline** using **Apache OpenNLP**.
- Engineered a multi-stage **NLP processor** with tokenization, keyword extraction, **intent classification** (GREETING, CODE_REQUEST, QUESTION etc.), **Named Entity Recognition** (EMAIL, URL, DATES, JAVA_CLASS, LANG), and **sentiment analysis** (POSITIVE/NEGATIVE/NEUTRAL/MIXED).
- Designed an **NLP-enriched context layer** that dynamically adapts the GPT-4o system prompt based on detected intent and sentiment — enabling **intent-based temperature tuning** for more accurate and context-aware responses.
- Implemented a **sliding-window conversation history** to maintain multi-turn dialogue context, with graceful error handling for API failures and edge cases.

Titanic Survival Prediction — ML Web App

2025

Tech Stack: Python, Flask, Scikit-learn, Pandas, HTML/CSS, Jinja2, REST API, joblib

- Extended a **Random Forest ML model (80%+ accuracy)** into a production Flask web application with a **Jinja2-templated UI** and real-time predictions.
- Exposed a **RESTful API endpoint** that accepts JSON passenger data and returns survival probability, consumable by external clients and front-end apps.

- Implemented **dual-layer form validation** (client-side JavaScript + server-side Python) and serialised the trained model with **joblib** for efficient production serving.

Cybersecurity Job Simulation — Deloitte Australia

2025

Tech Stack: Security Tools, Risk Assessment, OWASP Guidelines, Incident Response

- Investigated simulated security incidents; applied **OWASP Top 10** guidelines to identify and document web application vulnerabilities including XSS, SQL Injection, and CSRF.

EDUCATION

B.Tech in Computer Science & Engineering — CV Raman Global University, Bhubaneswar

Expected 2028

Relevant Coursework: Data Structures & Algorithms, Computer Networks, Operating Systems, Database Management Systems, Web Technologies, Software Engineering, Cybersecurity Fundamentals, Machine Learning, Cloud Computing

CERTIFICATIONS & SIMULATIONS

- **Python Certification** – HackerRank
- **Cybersecurity Job Simulation** – Deloitte Australia (Forage)

ADDITIONAL INFORMATION

Open Source:

Actively contributing to GitHub repositories; building portfolio projects demonstrating full-stack and API development skills.

Languages:

English (Professional), Hindi (Native)

Interests:

Web Performance Optimisation, RESTful API Design, Cloud Deployment, DevOps, Open Source Contribution, UI/UX Best Practices
